

**Mission of the Committee on Medical Student Education:**

1. Recognize the importance for the future of psychoanalysis of having an early impact on the attitude and values of medical students with regard to psychoanalytic concepts and treatment.
2. Recognize the vital contribution of psychoanalytic attitudes and concepts in helping physicians in all specialties in their work with patients.

**Goals of the Committee on Medical Student Education:**

1. Increase the coverage of psychoanalytic concepts in medical school curricula.
2. Increase the availability of personal psychodynamic psychotherapy for medical students.
3. Promote an awareness of psychoanalysis among medical students.
4. Deepen the possibilities for psychoanalytically informed experiences for medical students.
5. Support medical students and medical student educators with an interest in psychoanalysis.
6. Make available resources with regard to psychoanalytic concepts and treatment for medical students and medical student educators.
